1. Seasonal Resident Community Vision Session
Iacoangeli reminded the Team that the seasonal resident community vision session would be held that evening at 6:30 p.m. at the Farr Center. Attendance was appreciated but not required if members participated in the May 27 session.
2. Demographic Review
Sarah reviewed with the Team an overview of the demographics for the Village and Township. Some added information requested was the ratio of residents on wages versus residents on investments since the Township had a higher proportion of older residents. It was also noted that seasonal residents are usually in the Onekama Community for approximately 2 ½ months (June – August).
3. Project Maps
Iacoangeli shared with the Team some of the maps prepared for the project. It was requested on the wetland map that the affected parcels be displayed. Iacoangeli mentioned that the existing land use map would be prepared once information was obtained from the County. It was suggested by Team members that B&R prepare the map and Team members would assist with field verification.

The Smart Growth publication would be copies and sent to the Township for distribution to Team members.
